PROFILE

Detail-oriented professional with 2.5 years of hands-on experience in computer operations, programming, and mathematics. Strong at reasoning through code and quantitative problems, which translates directly into evaluating, ranking, and improving AI-generated responses (RLHF). Fluent across five languages — Hindi, Gujarati, Marathi, English, and Russian — making me well suited to multilingual AI training and data-quality projects. Reliable at following detailed annotation guidelines while working independently in remote, deadline-driven environments.

EXPERIENCE

AI Training Contributor (Freelance)
Remote · Maths & Coding projects

Open to work

- Evaluate and rank AI-generated code and math solutions for correctness, efficiency, and clarity.
- Write high-quality reference solutions and step-by-step explanations to help fine-tune model behavior.
- Apply detailed annotation guidelines consistently to maintain high quality and agreement scores.

Computer Operator & Programming Assistant
[Company Name] · [Location]

2.5 years

- Handled data entry, record management, and day-to-day computer operations with accuracy and speed.
- Built and debugged small programs and automated routine tasks using programming fundamentals.
- Solved mathematical and logical problems to support reporting and process accuracy.

EDUCATION

ITI — Computer Operator & Programming Assistant (COPA)
Industrial Training Institute

[Year]

HIGHLIGHTS

Strong foundation in mathematics and programming — ideal for code & math AI evaluation tasks.

Multilingual (5 languages) — valuable for multilingual data labeling and localization projects.

2.5 years of practical computer operations and programming experience.

Self-managed, deadline-driven, and comfortable adapting to changing guidelines.
